

Organizational policies and attitudes

Conclusion

Luljeta Bexheti

Regarding the data obtained, it was concluded connection between corporate organizational policy and workers' attitudes towards other ethnicities.

Introduction

Results

This research study includes the role of organizational policy of companies in forming attitudes towards other workers with different ethnicity.

The primary purpose and important in this research was the confirmation of the claim that there is a relationship between organizational policy and attitude of employees towards other ethnicities.

We can conclude that if the companies organizational policy reach to support and implement forms of cultural diversity, namely ethnicity, workers not only will have positive attitudes towards each another, but also high opinion for the organization.

In our study organizational politics means the way of presenting the company as the multiethnic company in front of the auditorium.

From the results of correlation of Pierson in Table 1, we see that the value of ($r = 0.519$ $p < 0.01$) is statistically significant, from where we can conclude that the above statement is justified.

References

Methods

The main technique used for the collection of this information is a questionnaire designed to measure precisely these factors.

As we have noted above that there is a relationship between organizational policy and attitudes towards other ethnicities, from its coefficient value we can understand that this correlation is positive.
